JOURNAL OF MOLECULAR LIQUIDS

Contents of Volume 47

The role of molecular shape in the glass transition process
S.S.N. Murthy (Andhra Pradesh, India) 1
A computational ab-initio model for the evaluation of thermodynamic functions for solvent transfer processes
R. Bonaccorsi, F. Floris and J. Tomasi (Pisa, Italy) 25
Monte Carlo simulation on the hydration of vitamin C molecule
M.Y. Song and M.S. Jhon (Seoul, Korea) 35
Dielectric behaviour and molecular association in monoalkyl ethers of ethylene glycol and of diethylene glycol in pure liquid state
H.D. Purohit and R.J. Sengwa (Jodhpur, India) 53
Theoretical investigation of the factors which determine the high rate of metal dissolution in the mixture of tetrahydrofuran with HCl
I.I. Sheykhet, L.L. Edelstein, N.M. Gontmacher, V.N. Levchuk, O.I. Barteneva, V.P. Grigoriev and B. Ya. Simkin (Rostov-on-Don, U.S.S.R.) 63
The ternary system water + 1-propanol + urea at 298.15K. Activity coefficients, partial molal volumes and Kirkwood–Buff integrals
E. Matteoli and L. Lepori (Pisa, Italy) 89
Far infra red circular dichroism and molecular dynamics
M.W. Evans (Ithaca, NY, U.S.A.) 109
Reorientational diffusion of tungsten hexacarbonyl in solution
S.P. Wang and M. Schwartz (Denton, TX, U.S.A.) 121
Raman study of vibrational relaxation of dimethylsulfoxide in solutions
T. Iliescu, S. Astilean and I. Bratu (Cluj-Napoca, Romania) 129
Monte Carlo simulation studies of the solvation of ions. 3. The non intramolecularly H-bonded form of glycine zwitterion
G. Alagona and C. Ghio (Pisa, Italy) 139
Depolarized Rayleigh scattering study of pyrimidine
S.L. Whittenburg, V.K. Jain and S.J. McKinnon (New Orleans, LA, U.S.A.) 161
A pulsed field gradient spin-echo nuclear magnetic resonance study of self-diffusion in isotropic micellar solutions containing potassium *n*-alkanoates and tetramethylsilane
M.A. Desando (Waterloo, Ont., Canada), G. Lahajnar and I. Zupančič (Ljubljana, Yugoslavia) and L.W. Reeves (Waterloo, Ont., Canada) 171
Fast dynamic Kerr-effect measurements: I - Effect of the electric field
D. Bourret (Montpellier, France) 181
Transport and thermodynamic properties of the systems (D,L)norleucine–water and (L)phenylalanine–water, at 25°C
L. Paduano, R. Sartorio, V. Vitagliano and L. Costantino (Naples, Italy) 193
Shear induced dipole relaxation, far infra red absorption, and depolarised light scattering
M.W. Evans (Egham, U.K.) 203
Investigation of the structure of liquid *n*-propylbenzene by X-ray diffraction
D. Lipiński (Poznań, Poland) 211
Corotating-frame constitutive equation for stress tensor and cross time correlation function: response to Evans and Heyes
B.C. Eu (Montreal, Que., Canada) 221
Comments on reply by Eu on co-rotating frames
M.W. Evans (Ithaca, NY, U.S.A.) 231

A generalized autocorrelation function and spectral density in dielectric relaxation processes
J.M. Forniés Marquina, J. Garay de Pablo and L.J. Boya (Zaragoza, Spain) 235
Relaxation diélectrique d'un systeme hétérogène binaire constitué de phosphates naturels
J.M. Forniés Marquina (Zaragoza, Spain), G. Vicq (Bordeaux, France) and M. Zyoutte (Rabat, Morocco) 253
Electric dipole moments and charge redistribution in some substituted ferrocenes
L. Phillips and S.W. Filipczuk (Sydney, NSW, Australia) 261
